Art Unit: 2858

1. Applicant's election without traverse of group I in Paper No. 6 is acknowledged.
2. Claims 25-58 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim.

Election was made **without** traverse in Paper No. 6.

3. It is noted that claims 1-5 and 20-21 have been canceled in paper # 9 filed on 06/01/98.
4. Claims 6-19 and 23-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 6-19 and 23-24, it appears that these claims depend on canceled claims 1 and 20. Therefore, the limitations of these claims are indefinite. In claim 22, it is unclear what "an electrical interconnection means", "a means for disposing said probe tip ends in electrical contact with contact location on said electronic device" represent. Are they shown in any of drawings? Furthermore, "said probe tip ends" has no antecedent basis.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 2858

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claim 22 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 and 11 of U.S. Patent No. 5,821,763. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations of claims 1-3 and 11 encompass the limitations of the instant claim 22.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Beaman et al (Pat # 5,371,654) disclose three dimensional high performance interconnect package.

Art Unit: 2858

Beaman (Pat # 4,998,885) discloses elastomeric area array interposer.
